

Topping Dispenser

Garnish or decorate ready meals at speeds
of up to 60 cycles per minute

FOOD SYSTEMS, LLC

"A tradition of quality and excellence"

- Compact machine size.
- All machines are approved for use in food-production facilities and conform to relevant European Community standards.
- Stand-alone unit that is quickly added and removed from production lines.
- Customized to your product specifications.

Topping Dispenser

Designed to service the ready-meal sector, the topping dispenser is used to dispensed any:

- ï Shredded topping
- ï Diced topping
- ï Minced topping
- ï Ground topping

...onto traveling containers. Available for almost any volumetric topping need, the topping dispenser is a simple addition to any production line. The machine uses a simple hardwired control circuit controlled via a movable operator control station.

Sanitary Construction

For over 25 years, Raque Food Systems has served the frozen and ready-meal industries with high quality, extremely reliable machinery. Built of durable food-grade material, Raque machines are truly designed to stand the test of time.

Additionally, Raque designs machines that are easy to clean. The Topping Dispenser can be cleaned a few simple steps. To clean the Topping Dispenser:

- ï Remove the hopper belt cleaning wire
- ï Remove the hopper
- ï Remove the hopper belt
- ï Clean and sanitize the machine with a high pressure spray

Each of the above steps is performed without requiring tools. Just one more feature Raque applies to make the production run easier.

Optional Equipment

A full range of accessory equipment and options are available including:

- ï Hopper Level Control
- ï Custom Interfacing
- ï Ability to run multiple recipes
- ï Customized according to your product specifications

Technical Data

Speed:	Up to 60 Cycles Per Minute in each of the lanes
Fill Capacity:	*
Width:	47-3/4" (1213-mm)
Height*:	62-5/8" (1590-mm)
Length*:	46" (1168-mm)

Electrical Requirements:
460 VAC // 3 Phase // 60 Hz
(415 VAC // 3 Phase // 50 Hz)

Pneumatic Requirements:
none

* NOTE: Fill weight is based on the product run in the machinery; however, the machine provides a large fill weight range.
