# CS-3S

## Average Speed:

Wheel - 120 Products Per Hour

Block - 240 Products Per Hour

## Function:

This model is built to cut wheel-shaped cheese products into wedges, and block-shaped cheese products into squares or rectangles. The machine is servo-driven and controlled by a touch screen to save cut patterns, speeding up the change over time from product to product. The machine is built for the cheese industry and is WDATCP accepted and is designed to USDA standards. This model is great for a production facility with the need to cut and slice several different types of cheese into many different configurations of portions.

## Benefits

- Achieve a return on investment through labor savings and improved portion quality and consistency
- Perfectly portion products every time
- Reliable and durable equipment backed by manufacturer's warranty
- Meets all safety and sanitation requirements for dairy facilities
- State of the art optical guarding system

## Industrial Cheese Portioning

## Power:

Compressed Air 10 CFM @ 90 PSI  
Electric 208V-240V, 6A

## Product Size Ranges:

Round - 18 in (46 cm) Diameter

Block - 18 in x 18 in Square

## Portion Size Ranges

Determined By Product

FoodTools machines are manufactured with heavy duty anodized aluminum, stainless steel, and ultra-high molecular weight plastic. The equipment is designed for complete wash down requirements in production facilities.

Specifications are subject to change and are dependent on the product portioned or additional accessories to standard equipment.
