# FMC

**Average Speed:**  
360 Products Per Hour

**Function:**  
This handheld machine is built to slice small blocks of cheese or butter into thin slices, the size of which is determined by the customer. Each machine is custom built to cut a specific product to a specific thickness. This is great for any bakery or production facility slicing cheese or butter into thin slabs. Common product uses are cheese bites, cheese pieces for salads, butter cubes for ingredients, butter slabs for retail products, and more.

- Benefits**
- Achieve a return on investment through labor savings and improved portion quality and consistency
  - Perfectly portioned slices every time
  - Small and compact design is perfect for locations with limited space
  - Stainless steel design is good for cheese production clean rooms
  - Easy washing and cleaning procedure for fast change over between products
  - Reliable and durable equipment backed by manufacturer's warranty
