

Excalibur Depositor

Application

The **Fedco Excalibur Depositor** is an automatic depositor for scaling of semi-fluid products at high production rates.

Features

- ✓ Deposits a wide variety of flowable products with equal scaling accuracy by use of a scaling mechanism consisting of a rotating blade in the depositing chamber which allows an extremely gentle movement of product.
- ✓ Standard depositing chambers are available in five sizes and three volumetric diameters to allow a scaling range from 3/4 ounce to over 80 ounces into a single pan per stroke.
- ✓ Allen Bradley PLC assures high accuracy scaling and quick changeover from one product to another.
- ✓ Designed for easy maintenance, simplicity of operation, longevity and fast changeover.
- ✓ Meets BISSC standards

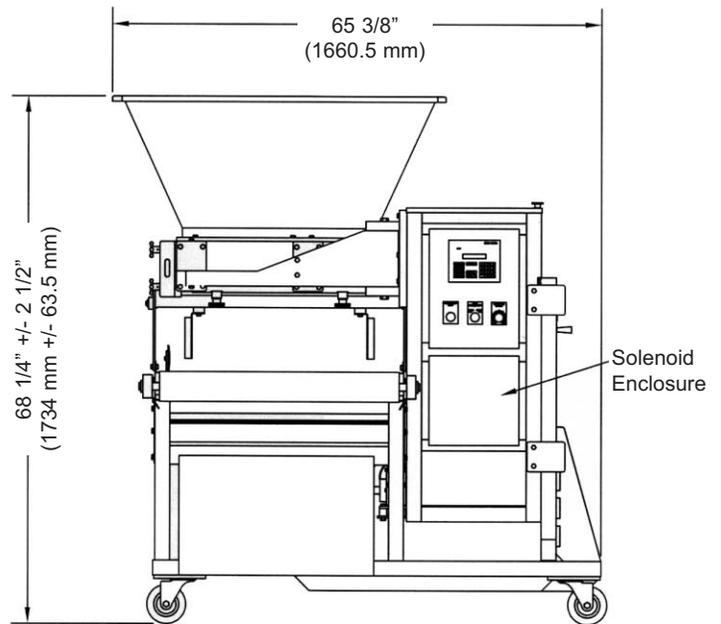

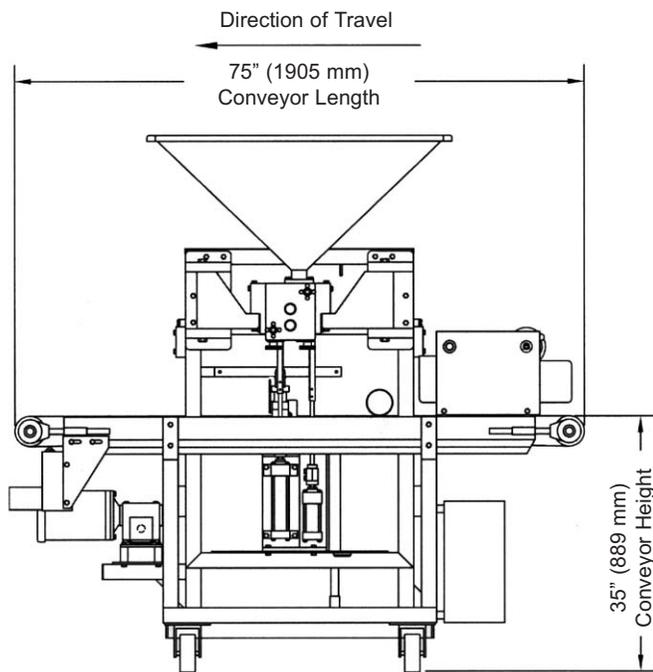

Excalibur Depositor

Options

- ✓ Level probe
- ✓ 340 quart extended hopper
- ✓ Cantilevered or conveyORIZED models available

Specifications

✓ Electrical: 120 volts, single phase, 60 Hz

- Mixing
- Depositing
- Icing & Topping
- Coating
