

Model EW-8 is Alpha Checkweigher's economical solution for users and applications that may only require an entry level checkweigher. The EW-8 offers 0.5g resolution. Utilizing a strain gauge loadcell for weighing packages up to 5 lbs and operating at speeds of up to 120 packages per minute, makes the EW-8 just as versatile and reliable as other Alpha models.

EW-8 Checkweigher

Economical Checkweigher

Model Specifications

Construction

Tubular stainless steel frame (standard)

Direction of Travel

Left to right or right to left

Conveyors

Variable speed

Weight Indicator

3 light tower (Accept, Overweight, Underweight)

Controls

Front mounted control box (standard)

Simplified full color touch screen HMI with embedded microprocessor controller

25 program memory

Reject Devices

Air blast, pusher, or bopper

Electrical Requirements:

110V single phase, 60 hz

Pneumatic Requirements:

80 psi/4 scfm

Options:

Data output

3 light tower weight indicator

Guide rails
