

ACCUPAN HIGH SPEED BUN SYSTEM

Shown with optional equipment

- **The Latest Automated Technology for High Speed Bun Roll Production**
- **Design Flexibility for Optimal Performance on a Variety of Products**

Features & Benefits

Design Innovations

- Extrusion Divider offers the most accurate scaling available with superior product quality
- Hinged Spiral tunnel Rounder Bars with gas spring assist for improved rounding symmetry and offering easier access for sanitation and maintenance, while eliminating sticking
- Servo Rotary Gate precisely times transfer between the zig-zag and the proofer tray at high production speeds and eliminates high maintenance associated with pneumatic actuators
- Electronic synchronization between the divider and proofer allows accurate timing without high maintenance chain or shaft drives
- Magnetic Pan Indexing provides the non-stop precision required for high-speed production and eliminates the mechanical indexer assembly, reducing maintenance costs and opening up the panning area for easy access

Design Flexibility

- The Accupan High Speed can handle a variety of production requirements with 4, 6, and 8-across configurations
- A variety of layout configurations including standard and reverse feed, right or left hand controls, and multiple proofer configurations allows the Accupan High Speed to fit in most production layouts
