

Our family of quality products for tomorrow's competitive edge.

FoodTools Model CS-10E

Automatic Sheet Pan Cake Slicer

The CS-10E Sheet Pan Slicer will slice a variety of products in a sheet pan, tin foil pan or cardboard box. Products can also be sliced out of the pan on a Lexan cutting board. A few of the products that can be sliced are sheet cakes, biscotti, brownies, blondies, dough, or ice cream. The CS-10E is supplied with a dedicated custom blade set to portion into triangles, rectangles or square shapes.

Features include:

- Dual start push buttons, E-Stop, and fully enclosed interlocked safety guards.
- Custom dedicated blade sets for a variety of portion sizes and shapes.
- Stainless Steel frame with lockable casters for mobility.
- Anodized aluminum and UHMW plastic construction.
- World class state-of-the-art pneumatic system in a modular design for ease of maintenance.

FoodTools Model CS-10TF

Manual Turntable Sheet Cake Slicer

The CS-10TF is capable of slicing all of the products listed under the CS-10E and the CS-10TW. The manual indexing system and lower cost design of the CS-10TF provides accurate and flexible portioning for customers operating in smaller scale production environments. The CS-10TF is designed to slice out of the sheet pan but can also be modified for in pan slicing.

Features include:

- Dual start push buttons, E-stop, and pneumatically interlocked safety guards.
- Fully adjustable product holder with lexan cutting boards.
- Quick change program strips for cutting a variety of portion sizes.
- Manual indexing systems allows for smooth and accurate portioning.
- Stainless Steel frame with lockable casters for mobility.
- Anodized aluminum and UHMW plastic construction.

FoodTools Model CS-10TW

Automatic Turntable Sheet Cake Slicer

The CS-10TW is capable of slicing all of the products listed under the CS-10E along with other more difficult to portion products. The CS-10TW's unique single guillotine blade and turntable design enables this machine to slice more delicate and/or stickier products such as layer sheet cakes, pound cakes, etc. The CS-10TW is designed to slice out of the sheet pan but can also be modified for in pan slicing.

Features include:

- Dual start push buttons, E-Stop and fully enclosed interlocked safety guards.
- Fully adjustable product holder with lexan cutting boards.
- Quick change program strips for cutting a variety of portion sizes.
- Stainless Steel frame with lockable casters for mobility.
- Anodized aluminum and UHMW plastic construction.
- World class state-of-the-art pneumatic system in a modular design for ease of maintenance.
